

# **MEASUREMENT**

## **IN PHYSICS**

### **LESSON 6**

**Prepared by  
Teacher Mayanja joseph  
Light academy secondary school**

**Measuring is a common phenomenon in everyday life for example buying paraffin ,buying sugar, during experiments and many other scenarios**

**So this chapter is very important and want you all to understand the competencies of this chapter**

# **Activity 2.0**

- **Write down 20 events/cases where measuring is done in everyday life and how it is done.**
- **Define measuring and how one can express measurements**

---

## **Activity 2.01**

- **Using a ruler(30cm) measure the length of you school left hand shoe.**
- **Take the measurement three(3) times**
- **Record the finding in a neat table with appropriate units**
- **Identify the possible sources of errors.**

*(<https://youtu.be/b38hFWvEjwI>)*

**Can you tell why measurements should be taken more than once?**
